

Miraculous

Composition:

1-triacontanol extracted from
Caramba wax-0.05%
Emulsifiers-5%
Solvent-94.95%

Target Crop : Tea Plantations ,coffee plantations,Fruits, Flowers, Vegetables, Pulses, Oil Seeds etc. Classification of mode of action : Used as a foliar spray - To check fruit, flower drop & stimulate

growth in agricultural crops. To be used in Tea Plantations to increases the photosynthetic efficiency of maintenance foliage during stress period and during the Banjhi spell to accelerate the bud breaking for Tea plant. Specially used to increase the leaf area index of plant leaves thereby increasing the photosynthetic capacity of the plant. During long spells of squally weather the use of the above product will ensure the increase of the photosynthesis rate form 5 to 15% and help complete the metabolism as required. Very useful as a growth enhancing hormone in the hill tea plantation where most of the time sunlight is a limiting factor.

Product Potential : Bio - chemically synthesized PGR used for preventing premature flower, bud and fruit dropping, stimulates flowering enhances fruiting. Helps in up taking trace elements through soil through its inherent action. Effective on all crops.

Dose and Application Procedure :Spray 1 ml/lit of water.

PACKING

1 Ltr. LDPE bottle x 12 = 12 Ltr. CFB
500 ml LDPE bottle x 30 = 15 Ltr. CFB
250 ml LDPE bottle x 50 = 12.5 Ltr. CFB
100 ml LDPE bottle x 100 = 10 Ltr. CFB
50 ml LDPE bottle x 150= 75 Ltr. CFB
25 ml LDPE bottle x 240= 12 Ltr CFB
